

CASE ANALYSIS SHEET

1. Recognize potential issues and major topics in the case. What is this case about? Underline terms or phrases that seem to be important to understanding this case. Then list 3-4 biology-related topics or issues in the case.

2. What specific questions do you have about these topics? First, by yourself, and then in a group, make a list what you already know that is related to the case in the “What Do I Know?” column. List questions you would like to learn more about in “What Do I Need to Know?” column.

What Do I Know?	What Do I Need to Know?

3. Put a check mark by **1-3** questions or issues in the “What do I need to know?” list that you think are most important to explore.

4. What kinds of references or resources would help you answer or explore these questions? Identify two different resources and explain what information the resource is likely to give that will help you answer the question(s). Choose specific resources.
